ABOUT ME

BS Information Technology graduate with hands-on experience in frontend web development, responsive design, and WordPress customization. Skilled in building user-friendly interfaces using HTML, CSS, JavaScript, React, and Elementor. Experienced with AI-assisted development workflows using tools like ChatGPT and Claude for debugging, code generation, and frontend implementation. Passionate about creating modern, responsive web applications with clean UI/UX design.

EXPERIENCE

WordPress Developer Intern | CLIMBS Life and General Insurance Cooperative

February 2026 – May 2026

- Developed responsive website interfaces using WordPress, Elementor, and Astra Theme
- Implemented frontend designs based on Figma references provided by the UI/UX designer
- Customized plugins and client-requested features
- Improved mobile responsiveness and UI consistency
- Assisted in debugging and full-stack maintenance
- Met with clients to present website progress, gather feedback, and implement revisions

PROJECTS

Renewable Energy Cooperative Website
